Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 8-19, and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Page(5,157,461).

Page teaches a fiber optical gyroscope comprising a multi-turn fiber ring of single mode fiber that is 1 km in length, and a depolarizer(454) at each end of the fiber ring. See figure 28B. The depolarizers(454) are Loyt depolarizers which includes two sections of birefringent single mode fiber(PM fiber) spliced at 45 degrees. The depolarizers are coupled an integrated optical coupler(IOC)(312) which includes a modal filter(364) which is a polarizer. See figures 13 and 28A.

Claims 1, 3, 4, 11, 13-17, 19, 20, and 23 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Liu et al(5,854,678).

Liu et al teach a fiber optical gyroscope comprising a coil of single mode fiber(42), and first and second depolarizers(41,43) one at each end of the fiber coil. The depolarizers are attaches to an integrated optical circuit(14) which includes a Y coupler and a polarizing waveguide(28). See figure 1.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 5-7, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Page(5,157,461).

A specific length for the depolarizers in Page is not given.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the depolarizers of any length as to reduce the signal fading at the detector.
